## Regulation of Shanghai Municipality on Promoting the Development of Artificial Intelligence Industries | 《上海市促进人工智能产业发展条例》

### Definitions of “Artificial Intelligence” & “Artificial Intelligence Industries” | “人工智能”与“人工智能产业”的定义

#### “artificial intelligence” | “人工智能”

Refers to “theories, methods, technologies, and application systems that use computers or computer-controlled machines to simulate, extend, and expand human intelligence for perceiving the environment, acquiring knowledge, and using knowledge to achieve optimal results”.

是指“利用计算机或者计算机控制的机器模拟、延伸和扩展人的智能,感知环境、获取知识并使用知识获得最佳结果的理论、方法、技术及应用系统”。

#### “artificial intelligence industries” | “人工智能产业”

Refers to “the development and production of software and hardware products, system applications, and integration services involved in the research and development as well as application of artificial intelligence technologies, including the key basic components industry, intelligent software industry, and intelligent terminal industry; and related industries brought about by the integrated application of artificial intelligence technologies in the economy, [everyday] life, urban governance, and other fields”.

是指“人工智能技术研发和应用所涉及的软硬件产品开发和生产、系统应用、集成服务等,包括关键基础元器件产业、智能软件产业、智能终端产业;以及人工智能技术在经济、生活、城市治理等领域融合应用带动的相关行业”。
